

What Makes Accountable2You Different?

Accountability software has been traditionally marketed toward one particular issue: objectionable content viewed online. It often comes with the stigma that the user must be struggling in that area to need such a software.

WE BELIEVE that by being accountable, an individual can live a life of integrity and follow the principle according to Galatians 6:1, "Keep watch on yourself, lest you too be tempted" (ESV).

WE VIEW accountability as a choice to take personal responsibility for our decisions and actions by developing rich communication with a trusted partner to help build character and achieve excellence.

Accountable2You provides a peer-based accountability platform, along with useful resources, to encourage individuals to be accountable for all device activity including screen time and device location.

Our Philosophy is Much Different!

Accountable2You
